

IGPS-9084GP

Industrial 12-port managed Gigabit PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X, SFP socket

Features

- Designed for Railway application and fully compliant with the requirement of EN50155/EN50121-4 standard
- Support O-Ring (recovery time < 30ms over 250 units of connection) and MSTP(RSTP/STP compatible) for Ethernet Redundancy
- Open-Ring support the other vendor's ring technology in open architecture
- O-Chain allow multiple redundant network rings
- Support standard IEC 62439-2 MRP (Media Redundancy Protocol) function
- 8 port P.S.E. fully compliant with IEEE802.3at standard, provide up to 30 Watts per port
- Support PoE on/off scheduled configuration
- Support PoE alive check and auto reboot fuction
- Support IEEE 1588v2 clock synchronization
- Support IPV6 new internet protocol version
- Support Modbus TCP protocol
- Support IEEE 802.3az Energy-Efficient Ethernet technology
- Provided HTTPS/SSH protocol to enhance network security
- Support SMTP client and NTP server protocol
- Support IP-based bandwidth management
- Support application-based QoS management
- Support Device Binding security function
- Support DOS/DDOS auto prevention
- IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic
- Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management
- Support ACL, TACACS+ and 802.1x User Authentication for security
- Support 9.6K Bytes Jumbo Frame
- Multiple notification for warning of unexpected event
- Support **DBU-01** backup unit device to quickly backup/restore configuration
- Web-based ,Telnet, Console (CLI), and Windows utility (Open-Vision) configuration
- Support LLDP Protocol
- Rigid IP-30 housing design
- DIN-Rail and wall mounting enabled

Introduction

IGPS-9084GP is managed redundant ring PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X SFP ports. The switch is designed for Railway application and fully compliant with the requirement of EN50155/EN50121-4 standard. The switch support Ethernet Redundancy protocol, **O-Ring** (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-9084GP also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IGPS-9084GP switch has 8x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection. And support wide operating

temperature from -40 °C to 75 °C. IGPS-9084GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. In addition, with its rugged design for railway certification, i.e., EN50155/EN50121-4 standard, make IGPS-9084GP to be solid and reliable for railway traffic communication and transportation application. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

- O-Ring: O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 30 milliseconds and up to 250 nodes. The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.
- Open-Ring: Open-Ring is an enhanced redundant technology that makes ORing's switches compatible with other
 vendor's proprietary redundant ring technologies. It enables ORing's switches to form a single ring with other
 vendor's switch. In cases where the ring is setup using proprietary technology, ORing offers a compatibility service
 where ORing can make its switches compatible with your particular network requirements.
- O-Chain: O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- MRP: Media Redundancy Protocol (MRP) is a data network protocol standardized by the IEC 62439-2. It allows
 rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with
 Spanning Tree Protocol.
- IP-based Bandwidth Management: The switch provide advanced IP-based bandwidth management which can limit the maximum bandwidth for each IP device. User can configure IP camera and NVR with more bandwidth and limit other device bandwidth.
- Application-Based QoS: The switch also support application-based QoS. Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- Device Binding Function: ORing special Device Binding function can only permit allowed IP address with MAC address
 to access the network. Hacker cannot access the IP surveillance network without permission. It can avoid hacker
 from stealing video privacy data and attacking IP camera, NVR and controllers.
- Advanced DOS/DDOS Auto Prevention: The switch also provided advanced DOS/DDOS auto prevention. If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack. It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- <u>IEEE 1588v2 Technology</u>: The IEEE 1588v2 technology can fulfill precision time synchronization requirements for protection and control applications.
- Modbus TCP: This is a Modbus variant used for communications over TCP/IP networks.
- IEEE 802.3az Energy-Efficient Ethernet: This is a set of enhancements to the twisted-pair and backplane Ethernet family of networking standards that will allow for less power consumption during periods of low data activity. The intention was to reduce power consumption by 50% or more.

Open-Vision

ORing's switches are intelligent switches. Different from other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.

Commander Host Monitor

Specifications

ORing Switch Model	IGPS-9084GP
Physical Ports	
10/100/1000Base-T(X) with P.S.E.	8
Ports in RJ45 Auto MDI/MDIX	•
100/1000Base-X with SFP port	4
Technology	
	IEEE 802.3 for 10Base-T
	IEEE 802.3u for 100Base-TX and 100Base-FX
	IEEE 802.3ab for 1000Base-T
	IEEE 802.z for 1000Base-X
	IEEE 802.3x for Flow control
	IEEE 802.3ad for LACP (Link Aggregation Control Protocol)
Ethernet Standards	IEEE 802.1p for COS (Class of Service)
	IEEE 802.1Q for VLAN Tagging
	IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol)
	IEEE 802.1s for MSTP (Multiple Spanning Tree Protocol)
	IEEE 802.1x for Authentication
	IEEE 802.1AB for LLDP (Link Layer Discovery Protocol)
	IEEE 802.3at PoE specification (up to 30 Watts per port for P.S.E.)
MAC Table	8k
Priority Queues	8
Processing	Store-and-Forward
Buffer Size	4Mbit

	Switching latency: 7 us
Switch Properties	Switching bandwidth: 24Gbps
	Max. Number of Available VLANs: 256
	IGMP multicast groups: 128 for each VLAN
	Port rate limiting: User Define
Jumbo frame	Up to 9.6K Bytes
	Device Binding security feature
	Enable/disable ports, MAC based port security
Security Features	Port based network access control (802.1x)
	VLAN (802.1Q) to segregate and secure network traffic
	Radius centralized password management SNMPv3 encrypted authentication and access security
	Https / SSH enhance network security
	STP/RSTP/MSTP (IEEE 802.1D/w/s)
	Redundant Ring (O-Ring) with recovery time less than 30ms over 250 units
	TOS/Diffserv supported
	Quality of Service (802.1p) for real-time traffic
	VLAN (802.1Q) with VLAN tagging
	IGMP Snooping
Software Features	IP-based bandwidth management Application-based QoS management
	DOS/DDOS auto prevention
	Port configuration, status, statistics, monitoring, security
	DHCP Server/Client/Relay
	SMTP Client
	Modbus TCP
	NTP server
	O-Ring
	Open-Ring
Network Redundancy	O-Chain
	MRP MSTP (RSTP/STP compatible)
RS-232 Serial Console Port	RS-232 in RJ45 connector with console cable. 115200bps, 8, N, 1
	NO-232 III NO-3 connector with console cable. 1132000ps, 6, N, 1
LED indicators	
Power Indicator (PWR)	Green: Power LED x 2
	Green: Power LED x 2 Green: Indicates that the system is operating in O-Ring Master mode
Power Indicator (PWR) Ring Master Indicator (R.M.)	
Power Indicator (PWR)	Green: Indicates that the system is operating in O-Ring Master mode
Power Indicator (PWR) Ring Master Indicator (R.M.)	Green: Indicates that the system is operating in O-Ring Master mode Green: Indicates that the system operating in O-Ring mode
Power Indicator (PWR) Ring Master Indicator (R.M.) O-Ring Indicator (Ring)	Green: Indicates that the system is operating in O-Ring Master mode Green: Indicates that the system operating in O-Ring mode Green Blinking: Indicates that the Ring is broken. Amber: Indicate unexpected event occurred
Power Indicator (PWR) Ring Master Indicator (R.M.) O-Ring Indicator (Ring) Fault Indicator (Fault)	Green: Indicates that the system is operating in O-Ring Master mode Green: Indicates that the system operating in O-Ring mode Green Blinking: Indicates that the Ring is broken.

Ordering Information

Packing List

- IGPS-9084GP x 1
- ORing Tool CD x 1
- Quick Installation Guide x 1

- DIN-Rail Kit x 1
- Wall-mount Kit x 2
- Console Cable x 1

Optional Accessories

- Open-Vision M500 : Powerful Network
 - Management Windows Utility Suit, 500 IP devices
- DBU-01 : backup unit device

- SFP100 series : 100Mbps SFP optical transceiver
 - SFP 1G series: 1Gbps SFP optical transceiver
