M2M Devices	
#08983 Net Price: Call Unit: pcs	
Wireless router M2M, 1x 10/100 (LAN), LTE, 2xSIM (WOI-RMBX-Lx2IO) The WOI-RMBX-Lx2IO is a small router made for wireless	
mar applications. It is a simal rotuet number of whiless interfaces powered by Telit embedded engine. Supporting UMTS/HSPA+/LTE it is dedicated for users seeking for easy and fast mobile Internet access. Internet connection is easily available and configurable via internet browser without any need of installing software or drivers for the device.	
Network standard GPRS: Yes EDGE: Yes UMTS: Yes	
HSPA+: Yes LTE: Yes Band	
Quad: Yes GSM Modem RS232: Yes USB: Yes	
Remote communication RS232: Yes RS485: Yes LAN 10/100Mbps: Yes	
WiFi: Optional Operation Inputs: Yes x4 Outputs: Yes x4	
Analog inputs: Yes x2 Monitoring I/O state: Yes/Yes GPS location: Optional

Industrial Switches

#07996 Net Price: 982,00 EUR Unit: pcs

Managed switch, 8x 10/100 RJ-45 PoE+ + 2 slide-in SFP slots w/DDM / RJ-45, O/Open-Ring <10ms (ORing IPS-3082GC-24V)

IPS-3082GC-24V is managed redundant ring Ethernet switch with 8x10/100Base-T(X) ports with PoE (P.S.E.) function and AxGigabit combo ports. With completely support of Ethernet redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IPS-3082GC-24V also supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IPS-3082GC-24V supports wide range 24-36VDC power inputs and generates 48VDC P.S.E. power output per port. Each IPS-3082GC-24V switch has 8X10/100Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide prover in a Destination 2020CCC 2011 uncertainty provide power in a PoE setup. IPS-3082GC-24V support new DDM (Digital Diagnostic Monitoring) function, which can monitor instantly the status of electronic voltage, current and temperature. All function of IPS-3082GC-24V can be managed centralized by a powerful windows utility -Open-Vision. In addition, the wide operating temperature range from -40 to 70oC can satisfy most of operating environment. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application with PoE function.

Managed switch, 8x 10/1000 RJ-45 PoE + 4 slide-in SFP slots, O/Open-Ring <20ms (ORing **IGPS-9084GP**)

IGPS-9084GP is managed redundant ring PoE Ethernet switch with $8\times10/100/1000Base-T(X)$ P.S.E. ports and $4\times100/1000Base-X$ SFP ports. The switch support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-9084GP also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IGPS-9084GP switch has 8x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection. And support wide operating temperature from -40 oC to 70 oC. IGPS-9084GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

Managed switch, 8x 10/1000 RJ-45 PoE + 4 slide-in SFP slots, O/Open-Ring <20ms, slim housing (ORing IGPS-9084GP-LA)

IGPS-9084GP-LA is layer2 managed PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X SFP ports. The switch support Ethernet Redundancy protocol, O-Ring (recovery time < 20ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-9084GP-LA also support Power over Ethernet, a system to transmit electrical power up to 30 watts. total PoE power budget is 240W max, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IGPS-9084GP-LA switch has 8x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection. And support wide operating temperature from -40 oC to 75 oC.

IGPS-9084GP-LA can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration.

#07640

Net Price: 955,00 EUR Unit: pcs

RGPS-9084GP-P-EU)	
RGPS-9084GP-P is managed redundant ring PoE Ethernet	
switch with 8x10/100/1000Base-T(X) P.S.E. ports and	
4x100/1000Base-X SFP ports. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time <	
30ms over 250 units of connection), Open-Ring	
,O-Chain,Fast Recovery,MRP and MSTP (RSTP/STP	
compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast	
recovery technology.	
RGPS-9084GP-P also support Power over Ethernet, a	
system to transmit electrical power up to 30 watts (-40 ~ 60°C provided total 240watts max., and 60 to 75°C provided total	
120watts max.), along with data, to remote devices over	
standard twisted-pair cable in an Ethernet network. Each	
RGPS-9084GP-P switch has 8x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch	
or hub for instance) that will provide power in a PoE	
connection. And support wide operating temperature from -40	
°C to 75 °C. RGPS-9084GP-P can also be managed centralized and convenient by Open-Vision, Except the	
Web-based interface, Telnet and console (CLI) configuration.	
Therefore, the switch is one of the most reliable choices and	
highly-managed Ethernet application. Physical Ports	
10/100/1000 Base-T(X) Ports in RJ45 Auto MDI/MDIX (with	
PoE): 8 (-40 ~ 60oC : provided total 240watts maximum, 60 ~	
75oC : provided total 120watts maximum) 1000 SFP: 4	
RS-232 Serial Console Port: RS-232 in RJ45 connector with	
console cable (115200bps 8 N 1) (support backup unit DBU-01)	
Technology	
Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X) and 100Base-FX, IEEE 802.3x for Flow	
control, IEEE 802.1D for STP (Spanning Tree Protocol), IEEE	
802.1p for COS (Class of Service), IEEE 802.1Q for VLAN Tagging, IEEE 802.1w for RSTP (Rapid Spanning Tree	
Protocol), IEEE 802.1X for Authentication, IEEE 802.3ad for	
LACP (Link Aggregation Control Protocol) MAC Table: 8192 MAC addresses	
Priority Queues: 4	
Processing: Store-and-Forward Switching latency: 7 μs	
Switching bandwidth: 24 Gbps	
Max. Number of Available VLANs: 256 IGMP multicast groups: 128/VLAN	
Port rate limiting: User Define	
Security Features: Enable/disable ports, MAC based port security, Port based network access control (802.1x), VLAN	
(802.1q) to segregate and secure network traffic, Radius centralized password management, SNMPv3 encrypted	
authentication and access security	
Software Features: STP/RSTP (IEEE 802.1D/w), Redundant Ring (O-Ring) with recovery time less than 30ms over 250	
units, TOS/Diffserv supported, Quality of Service (802.1p) for	
real-time traffic, VLAN (802.1Q) with VLAN tagging and GVRP supported, IGMP Snooping for multicast filtering, Port	
configuration, Port status, Port statistics, Port monitoring, Port	
security, Modbus TCP, NTP server Network Redundancy: STP, RSTP, O-Ring, MSTP	
LED Indicators	
Ring Master indicator: Green - indicates system operated in O-Ring Master mode

Managed switch, 22x 10/1000 RJ-45 PoE + 2x 10/100/1000 COMBO Ports with SFP + 2 slide-in SFP slots, O/Open-Ring <30ms, 19" (ORing RGPS-92222GCP-NP-P)

RGPS-92222GCP-NP series are Gigabit managed redundant ring PoE Ethernet switch with 22x10/100/1000Base-T(X) IEEE802.3at P.S.E. ports and 2xGigabit combo IEEE802.3at P.S.E. ports and 2x100/1000Base-X SFP ports. These switches support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. RGPS-92222GCP-NP series also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each RGPS-92222GCP-NP switch has (22+2)x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection And RGPS-92222GCP-NP / -P models support wide operating temperature from -40 oC to 70 oC. RGPS-92222GCP-NP series can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration.

Therefore, the switch is one of the most reliable choice for highly-managed and Fiber PoE Ethernet application.

Managed switch, L3, 8x 10/1000 RJ-45 PoE + 4 slide-in SFP slots, O/Open-Ring <20ms (ORing IGPS-R9084GP)

IGPS-R9084GP is Layer-3 managed redundant ring PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X SFP ports. The IGPS-R9084GP supports Layer-3 routing for better network performance on large-scale LANs into multiple subnets to support long-haul and EMI immunity communications. The hardware Layer-3 switch is optimized to transmit data as fast as Layer-2 o-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-R9084GP also support Power over Ethernet, a system to transmit electrical power up to 30 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IGPS-R9084GP switch has 8x10/100/100Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection and support wide operating temperature from -40°C to 75°C. IGPS-R9084GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

Smart switch, 4x 10/100 RJ-45 PoE + 2x 100 SFP, O-Ring <10ms (ORing IPS-2042P)

IPS-2042TX/2042FX are lite-managed Redundant Ring Ethernet switches with 4x10/100TX ports with PoE PSE function and 2x100Base-FX SFP ports. IPS series support Power over Ethernet, a system to transmit electrical power along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IPS switch has 4X10/100TX PSE (Power Sourcing Equipment) ports. PSE is a device (switch or hub for instance) that will provide power in a PoE setup. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection) and RSTP/STP (IEEE 802.1w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IPS-2042TX / 2042FX can be managed centralized and convenient by a powerful windows utility, Open-Vision. The wide operating temperature range from -40 to 70°C can satisfy most of operating environment. Therefore, the switch is one of the most reliable choice for easy managed and Fiber Ethernet application.

Unmanaged switch, 4x 10/100/1000 RJ-45 PoE, Gigabit PoE Ethernet, PCIe slot (ORing IGPCS-E140)

IGPCS-E140 is a PCI-Express unmanaged Gigabit PoE Ethernet switch card with P.S.E. function, IGPCS-E140 supports 4x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE port. IGPCS-E140 could be installed on any IPC motherboard with PCIe socket to make the IPC/embedded system able to communication with other Ethernet devices. Therefore, IGPCS-E140 is the best solution to IPC/embedded system to feature Ethernet network

Physical Ports

10/100/1000Base-T(X) Ports in RJ45 With P.S.E.: 4 10/100/1000Base-1(X) FOIS IN NOTE THAT TECHNOLOGY Technology Ethernet Standards: IEEE 802.3 for 10Base-T, IEEE 802.3u for 100Base-TX, IEEE 802.3ab for 1000Base-T, IEEE 802.3x for Flow control, IEEE 802.3at POE specification (total power budget is 65Watts with maximum 30Watts per port) MAC Table: 8192 MAC addresses Priority Queues: 4 Processing: Store-and-Forward Power Indicators Power Indicator: Green - Power LED x 1 PoE Power Indicator: Green - PoE power LED x 1 10/100/1000Base-T(X) RJ45 port indicator and PoE indicator: Green for port Link/Act, Green for PoE power injected. Unmanaged switch, 4x 10/1000 RJ-45 PoE, 1x 10/1000 RJ-45, 1x 1000 SFP socket, slim housing (ORing IGPS-1411GTPA)

IGPS-1411GTPA is an unmanaged PoE Ethernet switch with P.S.E. function. IGPS-1411GTPA support Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IGPS-1411GTPA has

4X10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE setup. The wide operating temperature range from -40oC to 70oC can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for PoE Ethernet application.

Unmanaged switch, 4x 10/1000 RJ-45 PoE, 1x 10/1000 RJ-45, 1x 1000 SFP socket, slim housing (ORing IGPS-1411GTP-24V) IGPS-1411GTP-24V is an unmanaged PoE Ethernet switch with P.S.E. function. IGPS-1411GTP-24V supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IGPS-1411GTP-24V has 4x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports, 1 additional Gigabit port, and 1x100/1000Base-X SFP port. The SFP port optical network speed can be set by changing the settings of the DIP-Switch below. IGPS-1411GTP-24V supports wide range 12~36VDC power inputs and generates 50VDC P.S.E. power output per port. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE setup. The wide operating temperature range from -40oC to 60oC can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for PoE Ethernet application. Unmanaged switch, 8x 10/1000 RJ-45 PoE, slim housing (ORing IGPS-1080A) IGPS-1080A is unmanaged PoE Ethernet switch with P.S.E. function. IGPS-1080A supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IGPS-1080A switch has 8X10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE setup. The wide operating temperature range from -40 to 70°C can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for PoE Ethernet application.

IGPS-1080A can be used in connecting several PoE P.D. Ethernet devices like IP-Camera or other Ethernet devices. In addition, there are two different power inputs at terminal block to avoid interruption caused by power down. When the primary DC power input fails, the backup power input will take over immediately to guarantee a non-stop operation.

Physical Ports 10/100/1000 Base-T(X) Ports in RJ45 with P.S.E. Unmanaged switch, 16x 10/100 RJ-45 (ORing IES-1160)

IES-1160 is the unmanaged Ethernet switch with 16x10/100Base-T(X) port. IES-1160 support redundant power inputs, relay output alarm, and surge protection. The wide operating temperature range from -40°C to 70°C can satisfy most of operating environments. Especially, IES-1160 features dual different redundant DC power inputs, two DC power inputs are on terminal block to avoid any unexpected fails on power on. Thus, IES-1160 could guarantee a non-stop operation. Therefore, the switch is one of the most reliable choice for highly-unmanaged Ethernet application Physical Ports 10/100 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 16 Tor hou base 1(x) Poils in R45 Auto MD/MDIX. No Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control MAC Table: 8192 MAC addresses Processing: Store-and-Forward Software Features: Port configuration, Port status, Port software features: Port concurity. statistics, Port monitoring, Port security LED Indicators Power indicator: Green - Power LED x 3 Fault indicator: Yellow - Indicate PWR1 or PWR2 failure 10/100TX RJ45 port indicator: Green for port Link/Act, Yellow for Duplex/Collision Fault contact Relay: Relay output to carry capacity of 1A at 24VDC Input power: Dual DC inputs. 12÷48VDC on 6-pin terminal Power consumption (typical): 9W Overload current protection: present Reverse polarity protection: present on terminal block Physical Characteristic Enclosure: IP-30 Dimension (W x D x H): 74.3mm x 109.2mm x 153.6mm Weight: 1060g Environmental Storage Temperature: -40+85°C(-40+185°F) Operating Temperature: -40+70°C (-40+158°F) Operating Humidity: 5%+95% Non-condensing Operating Humioty: 5%-59.% Non-condensing Regulatory approvals EMI: FCC Part 15, CISPR (EN55022) class A EMS: EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11 Shock: IEC60068-2-27 Free Fall: IEC60068-2-32 Viewti-ii. Unmanaged switch, 24x 10/100 RJ-45 (ORing IES-1240)

IES-1240 is the unmanaged Ethernet switch with 24x10/100Base-T(X) port. IES-1240 support redundant power inputs, relay output alarm, and surge protection. The wide operating temperature range from -40°C to 70°C can satisfy most of operating environments. Especially, IES-1240 features dual different redundant DC power inputs, two DC power inputs are on terminal block to avoid any unexpected fails on power on. Thus, IES-1240 could guarantee a non-stop operation. Therefore, the switch is one of the most reliable choice for highly-unmanaged Ethernet application Physical Ports 10/100 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 24 10/100 Base 1(A) Foris in root Ando Incention 2. . Smart switch, 4x 10/100 RJ-45 + 2x 100 MM SC, O-Ring <10ms (ORing IES-2042FX-MM-SC)

IES-2060/2042FX series are lite-Managed Redundant Ring Ethernet switches with 6x10/100Base-T(X) ports or 4x10/100Base-T(X) and 2x100Base-FX ports. With complete support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain and STP/RSTP (IEEE802.1w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IES-2060/2042FX series can be managed centralized and convenient by a powerful windows utility - Open-Vision. In addition, the wide operating temperature range from -40°C to 70°C can satisfy most of operating environment. Therefore, these switch is one of the most reliable choice for easy managed Fiber Ethernet application.

Physical Ports 10/100 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 4 100Base-FX Multimode ports (2km, 1310nm, SC connector):

Technology Ethernet Standards: IEEE 802.3 for 10BaseT. IEEE 802.3u Ethemet Standards: IEEE 802.3 for 1008ase1, IEEE 802.30 for 1008aseT(X) and 1008ase7, IEEE 802.33 for Flow control, IEEE 802.1D for STP (Spanning Tree Protocol), IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol), IEEE 802.3ad for LACP (Link Aggregation Control Protocol) MAC Table: 2048 MAC addresses Priority Queues: 4 Processing: Store-and-Forward Switching bandwidth: 1.0 Gbps

Smart switch, 5x 10/100 M12, O-Ring <10ms, IP67 housing (ORing IES-2050-M12)

IES-2050-M12 is a waterproof lite-managed redundant ring Ethernet switch with 5x10/100Base-T(X) ports which is full compliant with IP-67 standard. With complete support of Ethernet redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain and STP/RSTP (IEEE802.1w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technologies. It is specifically designed for the toughest industrial environments. In combination with its IP-67 design and the superb management functionalities. IES-2050-M12 is constructed of a rugged aluminum case and designed with IP-67 rated RJ45 Ethernet ports (M12 type connector), which provide a waterproof, and dust-tight connection. IES-2050-M12 can be managed centralized by a powerful windows utility -Open-Vision. In addition, the wide operating temperature, range from -40 to 70°C, can satisfy most of operating environment. The IES-2050-M12 can be easily adopted in almost all kinds of applications and provides the most rugged solutions for managing your network in outdoor. Therefore, IES-2050-M12 is one of the most reliable choices for industrial networking applications. Physical Ports 10/100 Base-T(X) Ports w/Auto MDI/MDIX: 5 Connector Type: Waterproof M12 Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control, IEEE 802.1D for STP (Spanning Tree Protocol), IEEE 802.1AB for LLDP (Rapid Spanning Tree Protocol), IEEE 802.1AB for LLDP (Link Layer Discovery Protocol) MAC Table: 2048 MAC addresses Priority Queues: 4 Procession: Store-and-Forward Physical Ports Processing: Store-and-Forward Switching bandwidth: 1.0 Gbps VLAN: Port Based Security Features: Enable/disable ports, VLAN to segregate and secure network traffic Software Features: STP/RSTP (IEEE 802.1D/w), Redundant Solivate Features, STFACTP (IEE 002-10/w), Reduited Ring (O-Ring) with recovery time less than 10ms over 250 units, Port configuration, Port status, Port statistics, Port monitoring, Port security Network Redundancy: STP, RSTP, O-Ring LED Indicators Power Indicator: Green - Power LED x 1, Indicates power input Ready Indicator: Amber - Ready LED x 1, Indicates system ready O-Ring Indicator: Amber - Indicates port operating in O-Ring mode (per port) 10/100TX Port Indicator: Green for port Link/Act. (per port) Input power: 9+30VDC Input power: 9+30/DC Connector Type: Waterproof M12 Power consumption (typical): 3W Overload current protection: present Reverse polarity protection: present Physical Characteristic Enclosure: IP-67 Dimension (W x D x H): 90mm x 40.5mm x 155mm Weight: 470g Environmental Storage Temperature: -40+85°C (-40+185°F) Operating Temperature: -40-70°C (-40+185°F) Operating Humidity: 5%+95% Non-condensing Regulatory approvals EMI: FCC Part 15, CISPR (EN55022) class A EMS: EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11 Shock: IEC60068-2-27 Free Fall: IEC60068-2-32 Vibration: IEC60058-2-6 Safety: EN60950 Weight: 470g

Smart switch, 5x 10/100 RJ-45, O-Ring <10ms (ORing IES-2050A)

IES-2050A is a lite-managed Ethernet switch. With very compact size of housing, you can install IES-2050A easily. In addition, it also supports of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain and STP/RSTP (IEEE802.1w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IES-2050A provide the setting ability of Web-GUI and Windows Utility, also support the simple DIP-Switch setting function which offer great flexibility to set up the Ring. IES-2050A is with rigid IP-30 housing design and can operate under harsh environment. The feature of wide operating temperature range from -40 to 70°C can satisfy most requirement of operation.

Managed switch, 7x 10/100 RJ-45 + 3 slide-in SFP slots / RJ-45, O/Open-Ring <10ms (ORing IES-3073GC)

IES-3073GC is managed Redundant Ring Ethernet switch with $7 \times 10/100$ Base-T(X) ports and $3 \times Gigabit$ combo ports. With complete support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. All function of IES-3073GC can be managed centralized and convenient by a powerful windows utility -Open-Vision. IES-3073GC support new DDM (Digital Diagnostic Monitoring) function, which can monitor instantly the status of electrical voltage, current and temperature. In addition, the wide operating temperature range from -40 to 70 $^\circ\text{C}$ can satisfy most of operating environment. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application

Managed switch, 7x 10/100 RJ-45 + 3 slide-in SFP slots / RJ-45, O/Open-Ring <10ms (ORing IES-P3073GC-HV)

IES-P3073GC series are IEC 61850-3 managed Redundant Ring Ethernet switch with 7x10/100Base-T(X) and 3xGigabit combo ports. These switches are designed for power substation application and rolling stock application, fully compliant with the requirement of IEC 61850-3 and IEEE 1613. And these switches designed for the toughest and fully compliant with EN50155 requirement. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain, MRP and MSTP/RSTP:2004/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. Another Open-Ring technology is also supported which can applied for other vendor's proprietary ring. O-Chain is the revolutionary network redundancy technology that provides the addon network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain provided ease-of-use while maximizing fault-recovery swiftness.

flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology. All function of IES-P3073GC series can be managed centralized and convenient by a powerful windows utility - Open-Vision. IES-P3073GC series support new DDM (Digital Diagnostic Monitoring) function, which can monitor instantly the status of electrical voltage, current and temperature. In addition, the wide operating temperature range from -40 to 85°C can satisfy most of operating environment. Therefore, these switches are one of the most reliable choices for highly-managed Fiber Ethernet application.

IES-3160 is an managed Redundant Ring Ethernet switch with 16x10/100Base-T(X) ports. With complete support of

Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring and

MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or

temporary malfunctions with its fast recovery technology. All function of IES-3160 can be managed centralized and

convenient by a powerful windows utility - Open-Vision. In

addition, the wide operating temperature range from -40 to 70° C can satisfy most of operating environment. Therefore,

Managed switch, 24x 10/100Base-T(X) RJ45 Ports + 2x 10/100/1000 COMBO Ports with SFP, O/Open-Ring <30ms (ORing RES-P9242GCL-HV)

RES-P9242GCL series are 26-port rack mount managed redundant ring Ethernet switch with $24 \times 10/100$ Base-T(X) and 2xGigabit Combo ports, SFP socket. These switches are designed for power substation application, and it is fully compliant with the requirement of IEC 61850-3 and IEEE 1613. These switches support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms), O-Chain, MRP*note, Fast Recovery and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. RES-P9242CCL series can also be managed centralized and convenient by Open-Vision, as well as the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

Unmanaged switch, 5x 10/1000 RJ-45, slim housing (ORing IGS-150B)

IGS-150B is a mini type unmanaged full gigabit Ethernet switch with 5 x 10/100/1000Base-T(X) ports. IGS-150B supports redundant power input and rigid mini size IP-30 housing. In addition, the wide operating temperature range from -40oC to 70oC can satisfy most of operating environment. Physical Ports 10/100/1000 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 5 Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control, IEEE 802.3ab for 1000Base-T MAC Table: 4096 MAC addresses Processing: Store-and-Forward LED Indicators Power indicator: Green - Power I ED x 2 Link/Act indicator. Jown dual color LED for Link/Act indicator. Down dual color LED for speed indicator Green - 1000Mbps, Amber - 100Mbps, Off - 10Mbps Relay: Relay output to carry capacity of 1A at 24VDC Power Input power: Dual DC inputs. 12+48VDC on 4-pin terminal block Power consumption (typical): 3.2W Overload current protection: present Reverse polarity protection: present Physical Characteristic Enclosure: IP-30 Dimension (W x D x H): 26.1mm x 70mm x 95mm Weight: 222g Environmental Storage Temperature: -40+85°C (-40+185°F) Operating Temperature: -40-70°C (-40+185°F) Operating Humidity: 5%+95% Non-condensing Regulatory approvals EMI: FCC Part 15, CISPR (EN55022) class A EMS: EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11 Shock: IEC60068-2-27 Free Fall: IEC60068-2-32 Vibration: IEC60068-2-6 Safety: EN60950 Weight: 222g Safety: EN60950 Warranty Warranty period: 5 years

Unmanaged switch, 3x 10/100/1000 RJ-45, Gigabit Ethernet, 1x 100/1000Base-X SFP, PCIe slot (ORing IGCS-E131GP)

IGCS-E131GP is a PCI-Express unmanaged Gigabit Ethernet switch card. IGCS-E131GP is a high performance LAN controller which provides 3x10/100/1000Base-T(X) auto MDI/MDIX Ethernet ports and 1x100/1000Base-X SFP ports. IGCS-E131GP could be installed on any IPC motherboard with PCIe socket to make the IPC/embedded system able to communicate with other Ethernet devices. The IGCS-E131GP's full bandwidth capability boasts a robust 1000Mbps capability through the PCI Express bus architecture. IGCS-E131GP no need to purchase a new

architecture. IGCS-E131GP no need to purchase a new switch or broadband router because the autonegotiation feature works with your existing switch, broadband router, or hub to provide the highest network speed available. The automatic full duplex

capability further increases bandwidth and eliminates packet collisions by allowing data to flow in both directions at the same time. Therefore, IGCS-E131GP is the best solution to IPC/embedded system to feature Ethernet network.

Unmanaged switch, 4x 10/1000 RJ-45 + 2x 1000 SFP (Wave Optics WO-IS-2GF4GC)

WO-IS-2GF4GC is an industrial Ethernet switch with extended temperature ranges developed by Wave Optics to fulfill needs in industries including smart traffic, expressways, smart cities, safe cities, new energy, smart manufacturing, and so on. The two Gigabit fiber port and four Gigabit copper ports provide a high packet forwarding rate and an ample back plane bandwidth, making the transmission of images clear and smooth Having an IP40 rated aluminum enclosure, a rail base designed to withstand severe vibration, and good EMC electromagnetic compatibility, this series of product is capable of working stably and reliably in extreme-temperature (-40°C to 85°C) and rugged industrial environments. Physical Ports 10/100/1000 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 4 100/1000Base-X SFP Ports: 2 Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3z for 1000Base-X MAC Table: 2048 MAC addresses Power Input power: Dual DC inputs. 9+48VDC on 5-pin terminal block Power consumption (typical): 6W Physical Characteristic Enclosure: IP-40 Dimension (W x D x H): 37mm x 85m x 116mm Weight: 430g Environmental Storage Temperature: -40+85°C (-40+185°F) Operating Temperature: -40+85°C (-40+185°F) Operating Humidity: 5%+95% Non-condensing Regulatory approvals EMS: IEC61000-4-2(ESD) level 4, IEC 61000-4-4 (EFT) level 4, IEC61000-4-5(Surge) level 4 Shock: IEC60068-2-27 Free Fall: IEC60068-2-32 Vibration: IEC60068-2-6 MTBF: 500000h

Managed modular switch, 16x 10/1000 RJ-45 + 4 slide-in SFP+ slots 10G, (ORing RGS-P9160GC-M1-HV)

RGS-P9160M1 series have three different models, RGS-P9160GCM1, RGS-P9160GFM1 and RGS-P9160FXM1. They are IEC 61850-3 and up to 24-port modular rack mount Gigabit managed redundant ring Ethernet switch with 16xGigabit combo / Gigabit fiber 100Mbit fiber ports and provided 1 modular switch slot to extend switch function. The switch is designed for power substation application and rolling stock application, fully compliant with the requirement of IEC 61850-3 and IEEE 1613. RGS-P9160M1 series support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms), O-Chain, *note MRP, Fast Recovery and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. RGS-P9160M1 series can also be managed centralized and convenient by Open-Vision, as well as the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet power substation application.

Managed switch, 3x 10/1000 RJ-45 + 2x1000 SFP w/DDM, O/Open-Ring <20ms (ORing IGS-3032GC)

IGS-3032GC is a full gigabit managed Redundant Ring Ethernet switch with 3x10/100/1000Base-T(X) and 2xGigabit combo ports. With complete support of Ethernet Redundancy protocol, O-Ring (recovery time < 20ms over 250 units of connection), Open-Ring, O-RSTP and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary

malfunctions with its fast recovery technology.

IGS-3032GC can be managed centralized and convenient by a powerful windows utility - Open-Vision.

The redundant DC power inputs guarantee a non-stop operation. The backup power input will take over immediately when the primary DC power input fails.

Managed switch, 8x 10/1000 RJ-45 + 12x100/1000 SFP w/DDM, O/Open-Ring <20ms (ORing IGS-P9812GP-HV)

IGS-P9812GP is IEC 61850-3 managed redundant ring Ethernet switch with 8x10/100/1000Base-T(X) ports and 12x100/1000Base-X SFP ports. The switch is designed for power substation application and rolling stock application, fully compliant with the requirement of IEC 61850-3 and IEEE 1613. And the switch designed for the toughest and fully compliant with EN50155 requirement. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. And support wide operating temperature from -40°C to 75°C. IGS-P9812GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet power substation and rolling stock application.

Managed switch, 8x 10/1000 RJ-45 + 4x100/1000 SFP w/DDM, O/Open-Ring <30ms (ORing IGS-9084GP)

IGS-9084GP is managed redundant ring Ethernet switch with 8x10/100/1000Base-T(X) ports and 4x100/1000Base-X SFP ports. The switch is designed for Railway application and fully compliant with the requirement of EN50155/EN50121-4 standard. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. And support wide operating temperature from -40°C to 75°C

support wide operating temperature from -40°C to 75°C. IGS-9084GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. In addition, with its rugged design for railway certification, i.e., EN50155/EN50121-4 standard, make IGS-9084GP to be solid and reliable for railway traffic communication and transportation application. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application. application.

Managed switch, 12x 10/1000 RJ-45 + 2x100/1000 SFP w/DDM, O/Open-Ring <30ms (ORing IGS-9042GP)

ORing's managed Ethernet switches are designed for industrial applications, such as rolling stock and vehicle applications. IGS-9122GP is managed redundant ring Ethernet switch with 12x10/100/1000Base-T(X) copper ports and 2x100/1000Base-X SFP ports. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection), Open-Ring

,O-Chain,MRP and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery -40°C to 75°C. IGS-9122GP can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choices for rolling stock and highly-managed Ethernet application

Managed switch, 16x 10/100/1000 COMBO Ports with SFP + 8 slide-in SFP slots, O/Open-Ring <30ms (ORing RGS-9168GCP-E-EU)

RGS-9168GCP series are Gigabit managed redundant ring Ethernet switch with 16xGigabit managed redultation ing 8x100/1000Base-X, SFP socket. These switches support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. And RGS-9168GCP series support wide operating temperature from -40 oC to 75 oC. RGS-9168GCP series can also be managed centralized and convenient by Open-Vision, Except the Web-based interfac Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.

Managed switch, 16x 10/1000 RJ-45 + 4x1000 MM SC, O/Open-Ring <30ms (ORing

IGS-9164GF/FX series are managed redundant ring Ethernet

switch with 16x10/100/1000Base-T(X) ports and 4-port fixed optical fiber port. IGS-9164GF provided 4x1000Base-X fiber

ports and IGS-9164FX provided 4x100Base-FX fiber ports. With completely support of Ethernet Redundancy protocol,

O-Ring (recovery time < 30ms over 250 units of connection) /Open-Ring/O-Chain/MRP/Fast Recovery and MSTP

applications from network interruptions or temporary malfunctions with its fast recovery technology. And support wide operating temperature from -40 oC to 75°C. IGS-9164GF/FX series can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the meet set witch is before the bibly meaned and

is one of the most reliable choice for highly-managed and

10/100/1000 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 16 1000Base-SX Multimode ports (550m, 850nm, SC

(RSTP/STP compatible) can protect your mission-critical

applications from network interruptions or temporary

Managed switch, 24x 10/100Base-T(X) RJ45 Ports + 2x 10/100/1000 COMBO Ports with SFP, O/Open-Ring <10ms (ORing RES-3242GC-EU)

RES-3242GC series is 26-port rack-mount managed Redundant Ring Ethernet switch with 24x10/100Base-T(X) and 2xGigabit Combo ports, SFP socket. With complete support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology RES-3242GC series can be managed centralized and convenient by a powerful windows utility - Open-Vision. RES-3242GC series also supports functions of network management, such as SNMP, RMON, Port Trunking, and Port/Tag-based VLAN security. RES-3242GC-E model support one full-range AC and dual DC power inputs from +12~48 VDC or -12~-48 VDC, and support extend operating temperature from -40 to 70°C. One additional relay output is provided for system alarm warning, Therefore, RES-3242GC series is one of the most reliable choice for highly-managed and Fiber Ethernet application.

Physical Ports 10/100Base-T(X) RJ45 Ports: 24 10/100J000 COMBO with SFP: 2 RS-232 Serial Console Port: RS-232 in RJ45 connector with console cable (9600bps 8 N 1)

Managed switch, L3, 8x 10/1000 RJ-45 + 12x100/1000 SFP w/DDM, O/Open-Ring <30ms (ORing IGS-R9812GP)

IGS-R9812GP is Layer-3 managed redundant ring Ethernet switch with 8x10/100/1000Base-T(X) ports and 12x100/1000Base-X SFP ports. The IGPSR9812GP supports Layer-3 routing for better network performance on large-scale LANs into multiple subnets to support long-haul and EMI immunity communications. The hardware Layer-3 switch is optimized to transmit data as fast as Layer-2 switches. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary maifunctions with its fast recovery technology. And support wide operating temperature from -40 to 75°C. IGSR9812GP can also be managed centralized and convenient by Open-Vision, as well as the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet power substation and rolling stock application.

4x10G module, SFP+ (ORing SWM-04GP+_4) Industrial 4-port Gigabit fiber module with 4x10G, SFP+ socket

1G/10	ged switch, L3, 24x 10/1000 RJ-45 + 4 G SFP+ slots, O/Open-Ring <30ms (ORing R9244GP+)
RGS-R	9244GP+ series are Layer-3 Gigabit managed
redund	ant ring Ethernet switch with
	100/1000Base-T(X) ports and 4x1G/10GBase-X SFP+
	These switches support Layer-3 function like RIP and
	buting. Also RGS-R9244GP+ series support Ethernet dancy protocol, O-Ring (recovery time < 30ms over
	its of connection) /Open-Ring/O-Chain/MRP/Fast
	and MSTP (RSTP/STP compatible) can protect
	ission-critical applications from network interruptions or
	ary malfunctions with its fast recovery technology.
	9244GP+ series support wide operating temperature
	0°C to 60°C. RGS-R9244GP+ series can also be
	ed centralized and convenient by Open-Vision as well Web-based interface, Telnet and console (CLI)
	ration. Therefore, the switch is one of the most reliable
	for highly-managed and Fiber Ethernet application.

Bypass Switch, 4x LC Duplex (ORing IBS-102FX-MM-LC)

Industrial 8-port Gigabit fiber module with 8x100/1000Base-X, IBS-102FX series are the external Bypass switches for 100M/1G/10G fiber optical networks. These fiber optical bypass switches protect the network from failures and subsequent maintenance by ensuring network integrity during power loss. Each of these fiber optical bypass switches includes Network ports and Monitor ports. The Network ports are used for connection to main-network connections and provide protection mechanism, and the Monitor ports are used for down-link local networking device. When the power is on, the operation mode of the Bypass switch is set to Normal, and the local networking device is connected with main-network. When power failure occurs, the Bypass switch is swiftly set to bypass mode to isolate the main-network from the local networking device. Physical Ports LC connector: 4 Duplex Multi-mode LC connector LC connector: 4 Duplex Multi-mode LC connector Fiber Ethernet Optical Fiber: Multi-mode - 50/125µm or 62,5/125µm Operating Wavelength: 780+1350 nm Insert loss: <1.0 dB Switch time: < 10ms DIP Switch Settings: DIP Switch No.1 - Power-1 failed warning detection - (On) relay enable (Off) relay disable DIP Switch No.2 - Power-2 failed warning detection - (On) relay enable (Off) relay disable LED Indicators Power indicator: Green - Ready LED x 2 Power indicator: Green - Ready LED x 2 Normal indicator: Green On - Operated in normal mode Fault indicator: Amber - Indicates power failure occurred Fault contact Relay: Relay output for power failure warning Power Input power: Dual 12~48 VDC power inputs at DC-Jack and 4-pin terminal block 4-pin terminal block
Power consumption (typical): 2.7W
Overload current protection: present
Reverse polarity protection: present

Industrial mini type Ethernet to fiber PoE media converter LFP with 1x10/1000Base-T(X) P.S.E. and 1x1000Base-FX, SFP socket (ORing IGPMC-111GP-BT-24V)

The IGPMC-111GP-BT-24V is a cost-effective solution for the conversion interface between 10/100/1000Base-T(X) and 100/1000Base-X SFP socket; it allows you to extend communication distance by optical fiber.

IGPMC-111GP-BT-24V supports MDI/MDIX auto detection, so you don't need to use crossover wires.

So you don't need to Use crossover Wires. IGPMC-111GP-BT-24V also support Power over Ethernet, a system to transmit electrical power up to 90 watts, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each IGPMC-111GP-BT-24V has 1x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) port to provide power in a PoE setup.

The IGPMC-111GP-BT-24V also supports the LFP (Link Fault Pass-through) feature. When one side of the link fails, the other side continues transmitting packets, and waiting for a response that never arrives from the disconnected side. Use the DIP-Switch to enable the LFP function, then IGPMC-111GP-BT-24V will force the link to shut down as soon as noticed that the other link has failed, giving the application software a chance to react to the situation.

The IGPMC-111GP-BT-24V with wide operating temperature range from -40 ~ 75oC and accepts a wide voltage range from dual 12~57 VDC power inputs, so it is suitable for harsh operating environments. Therefore, the IGPMC-111GP-BT-24V is reliable media converter with PoE

capability and can satisfy most demand of operating environment.

Industrial IEC 61850-3 Ethernet to fiber media converter with 1x10/100Base-T(X) to 1x100Base-FX fiber socket (ORing IMC-P111FX-MM-SC-LV)

IMC-P111 series is a cost-effective solution for the conversion between 10/100Base-T(X) and 100Base-FX interface, it allows you to extend communication distance by optical fiber. IMC-P111 series are designed for power substation application and rolling stock application, fully compliant with the requirement of IEC 61850-3 and IEEE 1613. IMC-P111 series supports MDI/MDIX auto detection, so you don't need to use crossover wires. IMC-P111 series with wide operating temperature range from -40 ~ 85OC and accepts a wide voltage range power inputs, so it is suitable for harsh operating environments. Therefore, the IMC-P111 series is reliable media converter

and can satisfy most demand of power substation and rolling stock application.

Media converter 1x USB (B) + 4x RS-232 slim (ORing ISC-4110U) ISC-4110U and ISC-8110U are intelligent and compact-size media converters that provide conversion between one Universal Serial Bus (USB) port and 4 or 8 High-Speed RS-232 serial ports. The ISC-4110U and ISC-8110U feature easy connectivity for traditional serial devices. The RS-232 standard supports full-duplex communication and handshaking signals (such as RTS, CTS, DSR, DTR) Internal high-speed transient suppressors on each data line protect the modules from dangerous voltages levels or spikes. ISC-4110U/8110U can derive the power from USB port or redundant power inputs. Therefore, ISC-4110U and ISC-8110U are among the most reliable choices for USB to RS-232 media converter applications. Physical Ports USB Connector: 1xB-type (Female), USB v2.0 Serial ports: 4xRS-232 RS-232 Signals: TxD, RxD, RTS, CTS, DTR, DSR, DCD, GND Baud Rate: 300 to 921.6Kbps LED Indicators Power Indicator: Green x1 Data Transmission Indicator: Green x4 Power Input power: USB bus power (self power) or Dual DC inputs by 12-48VDC on 2-pin terminal block and power jack Power consumption (typical): 1.6W (320mA@5V USB Bus Power) Protection Serial Port Protection: Build-in 15KV ESD protection Senal Port Protection: Build-in 15KV ESD protection Driver Support Operation System: Windows 2000 (32bit), Windows 20003/XP/Vista/2008/7 (32/64bit), Windows Mobile 5/6, PocketPC 2003, WinCE 4.2~5.2/6.0, Linux x86 (32/64bit) Physical Characteristic Enclosure: IP-30 Dimension (W x D x H): 26.1mm x 94.9mm x 144.3mm Weinbt: 348n Weight: 348g Environmental Storage Temperature: -40+85°C (-40+185°F) Operating Temperature: -40+70°C (-40+158°F) Operating Humidity: 5%+95% Non-condensing Operating Humiotly: 5%-59.5% Non-condensing Regulatory approvals EMI: FCC Part 15, CISPR (EN55022) class A EMS: EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11 Shock: IEC60068-2-32 Vibration: IEC60068-2-32 Vibration: IEC60068-2-6 Safety: EN60950-1

Industrial Gigabit High Power Injector, 1x10/1000 RJ-45 PoE + 1x10/1000 RJ-45 (ORing INJ-101GT++-60W)

The INJ-101GT++ PoE Injector series is not only an IEEE802.3at compliant device but also an advanced high power PoE injector. It is intelligent detection that provided 1-ports 10/100/1000Base-T (X) PoE outputs. The device does not turn on power until it detects a valid PoE signature from the PoE devices attached downstream on the Ethernet cable. This protection against damage to non-PoE compliant equipment which may be connected to the Ethernet cable. This protection against damage to non-PoE compliant equipment which may be connected to the Ethernet cable. Therefore, only an IEEE 802.3at/802.3af compliant device can be powered with the INJ-101GT++ PoE Injector. Typically in Gigabit networks the maximum allowable CAT5 cable length is about 100 meters, due to the limitation of the Ethernet standards. The INJ-101GT++ PoE Injector can function with any PoE P.D. equipment which is fully compliant with the IEEE 802.3at/at PoE standards, and provide the DIP switch configurator for High power PoE management. Physical Ports

Unmanaged switch, 8x 10/100 M12 Bypass, (ORing TES-1080-M12-BP2)

ORing's TransporterTM series Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway. The TES-1080-M12-BP2, which is compliant with the EN50155 standard, is an unmanaged Ethernet switch with 8x10/100Base-T(X) ports (4 of these ports also double as 2 sets of bypass ports).

TES-1080-M12-BP2 is constructed of a rugged aluminum case and designed with Ethernet ports (M12 type connector), which provide a dust-tight connection. TES-1080-M12-BP2 EN50155 Ethernet switch use M12 connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock.

TES-1080-M12-BP2 includes 2 sets of bypass ports that protect the network from failures and Network maintenance by ensuring network integrity during power loss. Each set of these bypass ports includes Network ports and Monitor ports.

The Network ports are used for connection to main-network connections and provide protection mechanism, and the Monitor ports are used for down-linking local networking device. When the power is on, the operating mode of the Bypass ports is set to Normal, and the local networking device is connected with main-network. When power failure occurs, the Bypass ports are swiftly set to bypass mode to isolate the main-network from the local networking device. In addition, the wide operating temperature range from -40°C to 70°C can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for rolling stock Ethernet application Physical Ports 10/100 Base-T(X) Bypass Ethernet Auto MDI/MDIX: 8 (Built-in 2 sets of bypass ports) Connector Type: Waterproof M12 Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control MAC Table: 8192 MAC addresses Processing: Store-and-Forward LED Indicators Power Indicator: Green - Power LED x 2. Unmanaged switch, 8x 10/100/1000 M12 PoE (ORing TGXPS-1080-M12-24V)

ORing's TransporterTM series un-managed Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway applications. The TGXPS-1080-M12-24V is an un-managed PoE Ethernet switch with 8x10/100/500/1000Base-T(X) P.S.E. which is specifically designed for the toughest and fully compliant with EN50155 requirement. TGXPS-1080-M12-24V also supports Power over Ethernet, a system to transmit electrical power. along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Each TGXPS-1080-M12-24V switch has 8X10/100/500/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE setup. TGXPS-1080-M12-24V EN50155 Ethernet switch use M12 connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock. In addition, the wide operating temperature range from -40oC to 75oC can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for rolling stock and highly-managed PoE Ethernet application. While installing in the train, TGXPS-1080-M12-24V is mainly used for in-train monitoring and Entertainment service due to its high speed Gigabit Ethernet connection and PoE capability. Devices connected will be IP camera or CCTV for the use of train surveillance. As an unmanaged Ethernet Switch, TGXPS-1080-M12-24V is not able and will not be used for any control related application Its main function is simply forwarding the Ethernet packet from one Ethernet based device to another Ethernet device which are all connected to the Switch. Physical Ports 10/100/1000 Base-T(X) Auto MDI/MDIX ports: 8 Connector Type: M12 Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control, IEEE 802.3ab for 1000Base-T, IEEE 802.3at compliant PoE specification (Maximum 30Watts per port) MAC Table: 4k MAC Table: 4k Processing: Store-and-Forward LED Indicators Power / Ready indicator: Green Power LED x 3 Fault Indicator: Amber Indicate PWR1 or PWR2 failure 10/100/1000Base-T(X) M12 port indicator and PoE indicator: Top for port Link/Act indicator. Smart switch, 5x 10/100 M12, O-Ring <10ms (ORing TES-250-M12)

ORing's Transporter series Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway applications. TES-250-M12 is a lite-managed redundant ring Ethernet switch with 10/100Base-T(X) ports which is compliant with EN50155 request. With complete support of Ethernet redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring and STP/RSTP (IEEE802.1w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technologies. It is specifically designed for the toughest industrial environments. TES-250-M12 EN50155 Ethernet switch uses M12 connectors to ensure tight, robust connections and guarantees reliable operation against environmental disturbances, such as vibration and shock. TES-250-M12 can be managed centralized by a powerful windows utility -Open-Vision. In addition, the wide operating temperature range from -40~70°C can satisfy most of operating environment. The TES-250-M12 can be easily adopted in almost all kinds of applications and provides the most rugged solutions for managing your network. Therefore, the switch is one of the most reliable choices for rolling stock and highly-managed Ethernet applications. Physical Ports 10/100 Base-T(X) Ports w/Auto MDI/MDIX: 5 Connector Type: Waterproof M12 Connector Type: Waterproof M12 Technology Ethernet Standards: IEEE 802.3 for 10BaseT, IEEE 802.3u for 100BaseT(X), IEEE 802.3x for Flow control, IEEE 802.1D for STP (Spanning Tree Protocol), IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol), IEEE 802.1AB for LLDP (Link Layer Discovery Protocol) MAC Table: 2048 MAC addresses MAC Table: 2048 MAC addresses Priority Queues: 4 Processing: Store-and-Forward Switching bandwidth: 1.0 Gbps VLAN: Port Based Security Features: Enable/disable ports, VLAN to segregate and secure network traffic, SNMP v3 encrypted authentication and access security Software Features: STP/RSTP (IEEE 802.1D/w), Redundant SoftWare Features: STF/RSTP (IEEE 002.10/W), Requiring Ring (O-Ring) with recovery time less than 10ms over 250 units, Port configuration, Port status, Port statistics, Port monitoring, Port security Network Redundancy: O-Ring, Open-Ring, Fast recovery, CTD DET STP RSTP LED Indicators Power Indicator: Green - Power LED x 1, Indicates power input Ready / Ring Master Indicator: Amber LED - Light on for system ready / Blinking for system ready and Ring master mode - Light off for system failed O-Ring Indicator: Amber - Indicates port operating in O-Ring mode (per port) 10/100TX Port Indicator: Green for port Link/Act. Managed switch, 8x 10/100 M12 + 2x 10/100/1000 M12 Bypass (ORing TES-3082GT-M12-BP1)

ORing's TransporterTM series managed Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway applications. The TES-3082GT-M12-BP1 is a managed Redundant Ring Ethernet switch with 8x10/100Base-T(X) and 2x10/100/1000Base-T(X) ports which is specifically designed for the toughest and fully compliant with EN50155 requirement. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-Chain and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology Another Open-Ring technology is also supported which can applied for other vendor's proprietary ring. TES-3082GT-M12-BP1 EN50155 Ethernet switch use M12

connectors to ensure tight, robust connections, and guarantee reliable operation against environmental

disturbances, such as vibration and shock. TES-3082GT-M12-BP1 can be managed centralized and convenient by a powerful windows utility ~ Open-Vision. In addition, the wide operating temperature range from -40 oC to 70oC can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for

rolling stock and highly-managed Ethernet application. Physical Ports

Smart switch, 8x 10/100 M12 Bypass, O-Ring <10ms (ORing TES-3080-M12-BP2)

The TES-3080-M12-BP2 is a managed Redundant Ring Ethernet switch with 8x10/100Base-T(X) ports which is compliant with EN50155 request. With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring, O-RSTP and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. It is specifically designed for the toughest industrial environments. TES-3080-M12-BP2 EN50155 Ethernet switch use M12 connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock. Another Open-Ring technology is also supported which can applied for other vendor's proprietary ring. TES-1080-M12-BP2 included dual bypass ports, These bypass ports protect the network from failures and Network maintenance by ensuring network integrity during power loss. Each of these bypass ports includes Network ports and Monitor ports. The Network ports are used for connection to main-network connections and provide protection mechanism, and the Monitor ports are used for down-link local networking device. When the power is on, the operating mode of the Bypass ports is set to Normal, and the local networking device is connected with main-network. When power failure occurs, the Bypass ports is swiftly set to bypass mode to isolate the main-network from the local networking device. Wireless router 3G, 2x 10/100 RJ-45 (WAN + LAN) + 1x 802.11a/b/g (WLAN) + 1x USB (ORing TAR-3120-M12)

ORing's Transporter series cellular VPN router is designed for industrial and rolling stock wireless applications, such as vehicle, and railway applications

TAR-3120-M12 is a reliable Dual-RF IEEE802.11a/b/g and IEEE 802.11b/g cellular VPN router with 2 ports LAN which is fully compliant with EN50155 certification. It supports 802.1X and MAC filter for security control. It can be configured to operate in 3 modes of routing function: Dynamic/Static IP route, PPPoE authentication, and Cellular Modem dial-up. Users can set up WLAN environment to fulfill demands of various applications rapidly by dialing up cellular modem.

TAR-3120-M12 EN50155 cellular VPN router use M-series connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock. TAR-3120-M12 provides dual RF wireless interfaces, which can provide IEEE 802.11 a/b/g and IEEE 802.11 b/g dual band wireless communication and can be applied to fulfill any demands of wireless applications. TAR-3120-M12 provides dual Ethernet ports in switch mode, so that you can use Daisy Chain to reduce the usage of Ethernet switch ports. Physical Ports

10/100Base-T(X) Ports: RJ45 Auto MDI/MDIX 2 (M12 connector - D coding) WLAN Interface

WAN Connection Type: Static/Dynamic IP, PPPoE, 3G

WAN Connection Type: Static/Dynamic IP, PPPOE, 3G Modem dial-up Antenna and Connector: 2 x 2 dBi (b/g mode) / 3dBi (a mode) on Reverse SMA connector, 2 x 2 dBi (Cellular modem) on Reverse SMA connector Radio Frequency Type: DSSS, OFDM

Wireless router 4G, 2x 10/100/1000 M12 (LAN) + 1x 802.11b/a/g/n (WLAN) (ORing TGAR-2062+-4GS-M12)

ORing's TransporterTM series cellular router is designed for industrial and rolling stock wireless applications, such as vehicle, and railway applications. TGAR-2062-4G-M12 is reliable IEEE802.11 a/b/g/n router with 2 ports LAN which is fully compliant with EN50155 certification. It supports 802.1X and MAC filter for security control. It could be configured to operate in 3 modes of routing function: Dynamic/Static IP route, PPPoE authentication, and Cellular modem dial up Users can set up WLAN environment to fulfill demands of various applications rapidly by dialing up cellular modem. TGAR-2062-4G-M12 EN50155 cellular VPN router use M-series connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock. In addition, TGAR-2062+-4G-M12 also provides P.D. feature on ETH2 which is fully compliant with IEEE802.3af PoE P.D. specification. Therefore, TGAR-2062-4G-M12 is one of the most reliable choices for rolling stock applications on the wireless network.

Wireless access point, 2x 10/100/1000 RJ-45 (LAN + PoE PD) + 1x 802.11b/g/n (WLAN) (ORing ÌAP-420+)

IAP-420 / IAP-420+ series are reliable 802.11 b/g/n WLAN Access Point with 2 ports LAN. It supports 802.1X and MAC filters for security control. It can be configured to operate in AP/Bridge/Repeater/AP-Client mode. You are able to APJBidge/Repeater/AP-Citent Inidee. You are able to configure IAP-420 / IAP-420+ series by WEB interface via LAN port or WLAN interface. In addition, IAP-420+ also provides P.D. feature on ETH1 which is fully compliant with IEEE802.3af PoE P.D. specification. Therefore, IAP-420 / IAP-420+ series are one of the best communication solutions for wireless applications on the industrial network.

Wireless router 4G LTE, 2x 10/100 RJ-45 (LAN) + 1x 802.11b/g/n (WLAN) + 1x RS-232/422/485 (ORing IMG-4312-4G)

IMG-4312-4G is an innovative 1 port RS-232/422/485 and 4G LTE cellular Gateway with 2 port 10/100Base-T(X) port. IMG-4312-4G also provide IEEE802.11 b/g/n wifi interface which have 150Mbps link speed. It could be configured to connect to the internet by dialing up 2G/3.5G/LTE cellular modem to fulfill demands of various applications rapidly a. In addition, IMG-4312-4G can also transfer data into 5 host PCs simultaneously for backup purposes. In addition, IMG-4312+-4G also provides P.D. feature on ETH1 p which is fully compliant with IEEE802.3af PoE P.D. specification Therefore, IMG-4312-4G is one of the best solutions for applications of wireless and serial communication. Device server, 1x RS-232/422/485 + 2x 10/100 RJ-45 (LAN) (ORing IDS-312L)		
IDS-312L is an innovative secure 1 port RS-232/422/485 to 2 port LAN device server with standard features of device server, such like TCP/IP interface and versatile operation modes: Virtual Com, Serial Tunnel, TCP Server, TCP Client, and UDP. In addition, the Windows untility, DS-Tool, could configure multiple devices and set up the mappings of Virtual Com. On the other hand, IDS-312L can simultaneously transfer data up to 5 redundant host PCs to avoid Ethernet connection breakdown or any host PC fails. IDS-312L supports RS-232/422/485 and provides dual redundant power inputs, 12~48 VDC, on terminal block to guarantee a non-stop operation. With wide operating temperature, -40~70oC, and rugged IP-30 housing design, IDS-312L series could operate in the harsh industrial environment. Therefore, IDS-312L is the best solution to the high demand of secure serial to Ethernet critical data communication.		
Physical Ports 10/100 Base-T(X) Ports in RJ45 Auto MDI/MDIX: 2 Serial Ports		
Connector: DB9 x1 Operation Mode: RS-232, RS-422, RS-485 4/2-wire, can be configured by DS-Tool Serial Baud Rate: 110 bps to 460.8 Kbps Data Bits: 7, 8 Parity: odd, even, none, mark, space Stop Bits: 1, 1.5, 2 RS-232: TxD, RXD, RTS, CTS, DTR, DSR, DCD, RI, GND RS-422: Tx+, Tx-, Rx+, Rx-, GND RS-485 (4-wire): Tx+, Tx-, Rx+, Rx-, GND Flow Control: XON/XOFF, RTS/CTS, DTR/DSR Network Protocol: ICMP, IP, TCP, UDP, DHCP, BOOTP, DNS, SNMP V1/V2c, HTTPS		
LED Indicators Power indicator PWR 1(2) / Ready: Green On - Power is on 10/100TX RJ45 port indicator: Green for port Link/Act Serial TX / RX LEDs: Amber - Serial port is receiving data, Green - Serial port is transmitting data		
Power Input power: Dual DC inputs. 12÷48VDC on 4-pin terminal block Power consumption (typical): 1.44W		
Overload current protection: present Reverse polarity protection: present Physical Characteristic Enclosure: IP-30 Dimension (W x D x H): 26 (W) x 75 (D) x 110 (H) mm		
Weight: 227g Environmental Storage Temperature: -40÷85°C (-40÷185°F)		
Operating Temperature: -40+70°C (40+158°F) Operating Humidity: 5%+95% Non-condensing Regulatory approvals EMI: FCC Part 15B, CISPR 32 (EN55032 Class A)		
EMS: EN61000-4-2 (ESD), EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11 Shock: IEC60068-2-27 Free Fall: IEC60068-2-32		
Vibration: IEC60068-2-6 Safety: EN60950-1 Warranty		
Warranty period: 5 years Industrial Transceivers

Industrial Power Supplies

#08402 Net Price: 74,70 EUR Unit: pcs

Power supply 120W 12VDC, P.F.C., DIN TS35 (Mean Well WDR-120-12)

DIN rail Mean Well WDR series meets the highest standards and criteria, so that it can be used to work in the industrial automation systems, machine control, power, lighting and a wide range of devices.

PSU device is enclosed in a metal housing that is resistant to low and high temperatures.

The power supply is cooled by the free flow of air, making it a highly fault-free - this is a very important feature when power supply is working continuously.

Output DC Voltage: 12V Rated current: 10A Current Range: 0+10A Rated Power: 120W Rated Power: 120W Ripple & noise (max.): 120mVp-p Voltage adjustment range: 12+15V Voltage tolerance: +/-1.5% Line regulation: +/-0.5% Setup & rise time: 2000ms & 70ms/400VAC at full load, 2000ms & 70ms/230VAC at full load Hold up time (typ.): 50ms/400VAC at full load, 50ms/230VAC at full load at full load Input Voltage range: 180+550VAC, 254+780VDC Frequency range: 47+63Hz Efficiency (typ.): 89,5% AC current (typ.): 055A/115VAC, 1.2A/230VAC Inrush current (typ.): 50A Leakage current (x3,5mA/530VAC Protection Overload: 105%+130% rated output power, protection type -constant current limiting - recovers automatically after fault at full load constant current limiting - recovers automatically after fault condition is removed Overvoltage: 16+18V, protection type - shut down o/p voltage Over temperature: 105°C +/-5°C (TSW1) detect on heatsink of power transistor, protection type - shut down o/p voltage & of power transistor, protection type - shut down o/p voltage & re-power on to recover Environment Working temperature: -25°C + 70°C Working humidity: 20+95% RH non-condensing Storage temperature: -40°C + 85°C Storage Humidity: 10+95% RH Temperature coefficient: +/-0.03%/°C (0+50°C) Vibration (component): 10+500Hz, 2G 10min./1cycle, 60min. each along X Y Z axes Vibration (mounting): compliance to IEC60068-2-6 Vibration (mounting): compliance to IEC60068-2-6 Safety & EMC Safety standards: UL508, UL60950-1, TUV EN60950-1 Withstand voltage: I/P-O/P 3kVAC, I/P-FG 1.5kVAC, O/P-FG 0.5kVAC 0.5kVAC Isolation resistance: I/P-O/P 100MΩ/500VDC, I/P-FG 100MΩ/500VDC, O/P-FG 100MΩ/500VDC EMI conduction & radiation: EN55011, EN55022 (CISPR22), EN61204-3 Class B Harmonic current: EN61000-3-2, EN61000-3-3 EMS immunity: EN61000-4-2/3/4/5/6/8/11, ENV50204, EN55024, EN61000-6-2 (EN50082-2), heavy industry level criteria A Others MTBF: min. 268000h MIL-HDBK-217F (25°C) Dimension (W x H x D): 40mm x 125,2mm x 113,5mm Weight: 0,65kg

Power supply 240W 24VDC, P.F.C., DIN TS35 (Mean Well WDR-240-24)

DIN rail Mean Well WDR series meets the highest standards and criteria, so that it can be used to work in the industrial automation systems, machine control, power, lighting and a wide range of devices.

PSU device is enclosed in a metal housing that is resistant to low and high temperatures.

The power supply is cooled by the free flow of air, making it a highly fault-free - this is a very important feature when power supply is working continuously.

Output DC Voltage: 24V Rated current: 10A Current Range: 0+10A Rated Power: 240W Ripple & noise (max.): 150mVp-p Voltage adjustment range: 24+28V Voltage tolerance: +/-1.0% Line regulation: +/-0.5% Load regulation: +/-1.0% Setup & rise time: 800ms & 150ms/400VAC at full load, 1500ms & 150ms/230VAC at full load Hold up time (typ.): 18ms/400VAC at full load, 18ms/230VAC at full load Input Voltage range: 180+550VAC, 254+780VDC Frequency range: 47+63Hz Efficiency (typ.): 91% AC current (typ.): 1A400VAC, 2A/230VAC Inrush current (typ.): 50A Leakage current: <3,5mA/530VAC Protection Overload: 105%+130% rated output power, protection type -constant current limiting - recovers automatically after fault at full load constant current limiting - recovers automatically after fault Condition is removed Overvoltage: 29÷33V, protection type - shut down o/p voltage & re-nower on to recover Over temperature: 90°C +/-5°C (TSW1) detect on heatsink of power transistor, protection type - shut down o/p voltage & re-power on to recover re-power on to recover Environment Working temperature: -30°C + 70°C Working humidity: 20+95% RH non-condensing Storage temperature: -40°C + 85°C Storage Humidity: 10+95% RH Temperature coefficient: +/-0.03%/°C (0+50°C) Vibration (component): 10+500Hz, 2G 10min./1cycle, 60min. each along X Y Z axes Vibration (mounting): compliance to IEC60068-2-6 Vibration (mounting): compliance to IEC60068-2-6 Safety & EMC Safety standards: UL508, UL60950-1, TUV EN60950-1 Withstand voltage: I/P-O/P 3kVAC, I/P-FG 1.5kVAC, O/P-FG 0.5kVAC USVAC Isolation resistance: I/P-O/P 100MΩ/500VDC, I/P-FG 100MΩ/500VDC, O/P-FG 100MΩ/500VDC EMI conduction & radiation: EN55011, EN55022 (CISPR22), EN61204-3 Class B Harmonic current: EN61000-3-2, EN61000-3-3 EMS immunity: EN61000-4-2/3/4/5/6/8/11, ENV50204, EN55024, EN61000-6-2 (EN50082-2), heavy industry level criteria A Others

MTBF: min. 268000h MIL-HDBK-217F (25°C) Dimension (W x H x D): 63mm x 125,2mm x 113,5mm Weight: 1,06kg

#08407 Net Price: 210,00 EUR Unit: pcs

Power supply 480W 24VDC, P.F.C., DIN TS35 (Mean Well WDR-480-24)

DIN rail Mean Well WDR series meets the highest standards and criteria, so that it can be used to work in the industrial automation systems, machine control, power, lighting and a wide range of devices.

PSU device is enclosed in a metal housing that is resistant to low and high temperatures.

The power supply is cooled by the free flow of air, making it a highly fault-free - this is a very important feature when power supply is working continuously.

Output DC Voltage: 24V Rated current: 20A Current Range: 0÷20A Rated Power: 480W Ripple & noise (max.): 100mVp-p Voltage adjustment range: 24÷28V Voltage tolerance: +/-1.0% Line regulation: +/-0.5% Load regulation: +/-1.0% Setup & rise time: 800ms & 150ms/400VAC at full load, 2000ms & 150ms/230VAC at full load Hold up time (typ.): 18ms/400VAC at full load, 16ms/230VAC at full load Input Voltage range: 180+550VAC, 254+780VDC Frequency range: 47+63Hz Efficiency (typ.): 92% AC current (typ.): 16A/400VAC, 4A/230VAC Inrush current (typ.): 50A Leakage current is 3,5mA/530VAC Protection Overload: 105%+130% rated output power, protection type -constant current limiting - recovers automatically after fault at full load constant current limiting - recovers automatically after fault Overvoltage: 29÷33V, protection type - shut down o/p voltage A re-power on to recover Over temperature: 95°C +/-5°C (TSW1) detect on heatsink of power transistor, protection type - shut down o/p voltage & power transistor, protection type - shut down o/p re-power on to recover Environment Working temperature: -30°C + 70°C Working humidity: 20+95% RH non-condensing Storage temperature: -40°C + 85°C Storage Humidity: 10+95% RH Temperature coefficient: +/-0.03%/°C (0+50°C) Vibration (component): 10+500Hz, 2G 10min./1cycle, 60min. each along X Y Z axes Vibration (mounting): compliance to IEC60068-2-6 Safety & EMC Safety standards: UL508, UL60950-1, TUV EN60950-1 Withstand voltage: I/P-O/P 3kVAC, I/P-FG 1.5kVAC, O/P-FG 0.5kVAC Isolation resistance: I/P-O/P 100MΩ/500VDC, I/P-FG 100MΩ/500VDC, O/P-FG 100MΩ/500VDC EMI conduction & radiation: EN55011, EN55022 (CISPR22), EN61204-3 Class B Harmonic current: EN61000-3-2, EN61000-3-3 EMS immunity: EN61000-4-2/3/4/5/6/8/11, ENV50204, EN55024, EN61000-6-2 (EN50082-2), heavy industry level criteria A Others MTBF: min. 268000h MIL-HDBK-217F (25°C) Dimension (W x H x D): 85.5mm x 125.2mm x 128.5mm Weight: 1.7kg

#06674 Net Price: 12,10 EUR Unit: pcs

Power supply 10W 24VDC, mini, DIN TS35 (Mean Well MDR-10-24)

DIN rail Mean Well MDR series meets the highest standards and criteria, so that it can be used to work in the industrial automation systems, machine control, power, lighting and a wide range of devices.

The power supply is cooled by free air flow, making it a highly fault-free - a very important feature when power supply is working continuously. Operating temperature for this model ranges from -20 to +70 degrees Celsius. Moreover, the PSU has an overload protection 105-160% of the nominal value. Output Duput DC Voltage: 24V Rated current: 0.42A Current Range: 0+0.42A Rated Power: 10W Ripple & noise (max.): 150mVp-p Voltage tolerance: +/-2.0% Line regulation: +/-2.0% Load regulation: +/-2.0% Setup & rise time: 500ms & 30ms/230VAC at full load, 1000ms & 30ms/115VAC at full load Hold up time (typ.): 120ms/230VAC at full load, 25ms/115VAC at full load Input Voltage range: 85÷264VAC, 120÷370VDC Frequency range: 47÷63Hz Efficiency (typ.): 84% AC current (typ.): 0.33A/115VAC, 0.21A/230VAC Inrush current (typ.): 35A/115VAC cold start, 70A/230VAC cold start Leakage current: <1mA/240VAC Protection Overload: above 105% rated output power, protection type -Hiccup mode - recovers automatically after fault condition is removed Overvoltage: 27.6+32.4V, protection type - shut down o/p voltage & re-power on to recover Function DC OK active signal: 18+27V/20mA DC OK active signal: 18+27V/20mA Environment Working temperature: -20°C + 70°C Working humidity: 20+90% RH non-condensing Storage temperature: -40°C + 85°C Storage Humidity: 10+55% RH Temperature coefficient: +/-0.03%/°C (0+50°C) Vibration (component): 10+500Hz, 2G 10min./1cycle, 60min. each along X Y Z axes Vibration (mounting): compliance to IEC60068-2-6 Safety & EMC Safety & EMC

Power supply 480W 24VDC, DIN TS35, P.F.C. (Mean Well SDR-480-24)

DIN rail Mean Well SDR series meets the highest standards and criteria, so that it can be used to work in the industrial automation systems, machine control, power, lighting and a wide range of devices.

PSU device is enclosed in a metal housing that is resistant to low and high temperatures. Power supplies of this group can withstand a load of 150% of the rated power for 3 seconds.

The power supply is cooled by the free flow of air, making it a highly fault-free - this is a very important feature when power supply is working continuously.

Output DC Voltage: 24V Rated current: 20A Rated current: 20A Current Range: 0+20A Rated Power: 480W Ripple & noise (max.): 100mVp-p Voltage adjustment range: 24+28V Voltage tolerance: +/-1.2% Line regulation: +/-0.5% Load regulation: +/-1.0% Setup & rise time: 1500ms & 60ms/230VAC at full load, 3000ms & 40ms/115VAC at full load Hold up time (typ.): 14ms/230VAC at full load, 20ms/115VAC at full load Input Voltage range: 90+264VAC, 127+370VDC Frequency range: 47+63Hz Power factor (typ.): 0.94/230VAC at full load, 0.99/115VAC at full load Efficiency (typ.): 94% AC current (typ.): 5A/115VAC, 2.5A/230VAC Inrush current (typ.): 40A/115VAC cold start, 80A/230VAC cold start Leakage current: <0.8mA/240VAC Protection Overload: 110%+150% rated output power, protection type constant current limiting - recovers automatically after fault Overvoltage: 29+33V, protection type - shut down o/p voltage & re-power on to recover Over temperature: 105°C +/-5°C (TSW1) detect on heatsink of power transistor, protection type - shut down o/p voltage & re-power on to recover Environment Environment Working temperature: -25°C + 70°C Working humidity: 20+95% RH non-condensing Storage temperature: -40°C + 85°C Storage Humidity: 10+95% RH Temperature coefficient: +/-0.03%/°C (0+50°C) Vibration (component): 10+500Hz, 2G 10min./1cycle, 60min. each along X Y Z axes Vibration (mounting): compliance to IEC60068-2-6 Safety & EMC Safetv & EMC Safety standards: UL508, UL60950-1, TUV EN60950-1 Withstand voltage: I/P-O/P 3kVAC, I/P-FG 1.5kVAC, O/P-FG 0.5kVAC Isolation resistance: I/P-O/P 100MQ/500VDC, I/P-FG 100MQ/500VDC, 0/P-FG 100MQ/500VDC EMI conduction & radiation: EN55011, EN55022 (CISPR22), EN61204-3 Class B EN01204-3 Class B Harmonic current: EN01000-3-2, EN01000-3-3 EMS immunity: EN01000-4-2/3/4/5/6/8/11, ENV50204, EN55024, EN01000-6-2 (EN50082-2), heavy industry level criteria A

Industrial Gigabit High Power Injector, 2x10/1000 RJ-45 PoE + 2x10/1000 RJ-45 (ORing INJ-102GT++)

The INJ-102GT++ PoE Injector series is not only an IEEE802.3at compliant device but also an advanced high power PoE injector. It is intelligent detection that provided 2-ports 10/100/1000Base-T (X) PoE outputs. The device does not turn on power until it detects a valid PoE signature from the PoE devices attached downstream on the Ethernet cable. This protection against damage to non-PoE compliant equipment which may be connected to the Ethernet cable. Therefore, only an IEEE 802.3at/802.3af compliant device can be powered with the INJ-102GT++ PoE Injector. Typically in Gigabit networks the maximum allowable CAT5 cable length is about 100 meters, due to the limitation of the Ethernet standards. Because of its 24-57VDC power input with boosting circuit, the total output power can be up to 180Watts[Note2] for all ports usage. The installer doesn't need to worry about voltage drops caused by cable length. The INJ-102GT++ PoE Injector can function with any PoE P.D. equipment which is fully compliant with the IEEE 802.3at/802.3af PoE standards.

Note1: The equipment being powered must be fully IEEE 802.3at/802.3af compliant in order for the power supply to be able to sense the PoE devices signature and apply power. Power is supplied on Ethernet pins 1/2 (V+) and 3/6 (V-).

Note 2: LTPoE++TM PSE technology is applied on this product. Only when an LTPoE++ TM Powered Device (PD) is attached can the PSE port deliver up to 180W of output power. Physical Ports

Physical Ports 10/100/1000Base-T(X) in RJ-45 Ethernet Port Input: 2 10/100/1000Base-T(X) in RJ-45 Ethernet Port with P.S.E. Output: 2 Output: 2 Operating Voltage Input Voltage: 50 ~ 57 VDC / 4-pin terminal block Output Power: 57V / 3157mA, 180 Watts max. Network Management Utility (Oring Open Vision v3.6 M50)

A powerful management utility is important for administrators to monitor and manage all devices in a local network.

over Ethernet systems. With Ethernet Input (data + power) port and Output (data only) port, SPL-101GT may split power from existing LAN cable and convert up to 24VDC/1.25A for power hungry applications such as Wireless APs, Security cameras and IP Phones. The internal current limit, short-circuit and overload protection are implemented for use as a DC power supply. Physical Ports 10/100/1000Base-T(X) in RJ-45 Ethernet Port Input: 1 10/100/1000Base-T(X) in RJ-45 Ethernet Port with P.S.E.
